**Trends and observations**

- Compliance with the speed limit has improved slightly at this location.
- Excessive speeding remains a concern at this location. There is no clearly identifiable pattern, other than that speeding predominantly occurs during the day, rather than at night as might be expected. In fact, three of the four speeding violations in excess of 50 mph occurred between 09:00 and 11:00 in the morning.
- The data collected would **not** support a reduction in the speed limit 20 mph **at this location**, but there is still solid evidence and support for a reduction in the speed limit to 20 mph further into the village.
